

Position: Vice President

### **Company Overview:**

My client is a leading provider of On-site Sewage Disposal System Designs & Approvals, specializing in delivering high-quality and sustainable solutions. They pride themselves on their commitment to environmental stewardship and delivering exceptional service to their clients. They are seeking a highly skilled and experienced Vice President of Geotechnical Engineering to lead their geotechnical team and drive their engineering initiatives.

### **Role Overview:**

The Vice President of Geotechnical Engineering will play a pivotal role in overseeing and managing all geotechnical engineering activities within the company. This senior leadership position requires a strategic thinker with strong technical expertise, business acumen, and a passion for delivering innovative and sustainable geotechnical solutions. The successful candidate will collaborate with cross-functional teams, provide technical guidance, and ensure the highest standards of geotechnical engineering excellence.

### **Responsibilities:**

- Lead and manage the geotechnical engineering department, including a team of geotechnical engineers and specialists.
- Develop and implement strategic plans to drive growth, enhance operational efficiency, and ensure exceptional project delivery.
- Provide technical expertise and guidance on geotechnical engineering matters, including soil analysis, site evaluations, design optimization, and regulatory compliance.
- Oversee the development and review of geotechnical reports, designs, and specifications for on-site sewage disposal systems.
- Collaborate with clients, architects, and regulatory agencies to address geotechnical challenges and ensure compliance with relevant standards and regulations.
- Monitor industry trends, advancements, and best practices in geotechnical engineering to drive continuous improvement and innovation within the company.
- Establish and maintain strong relationships with key stakeholders, including clients, contractors, and industry professionals.
- Drive a culture of safety, quality, and environmental responsibility across geotechnical engineering projects.
- Foster professional development and mentorship within the geotechnical team, promoting knowledge sharing and career growth opportunities.

### **Qualifications:**

- Bachelor's or Master's degree in Geotechnical Engineering or a related field.
- Professional Engineer (PE) license required.
- Minimum of 7 years of progressive experience in geotechnical engineering, with a focus on on-site sewage disposal systems.

- Strong knowledge of soil mechanics, geotechnical analysis, and design principles.
- Proven track record of successfully leading and managing geotechnical engineering projects.
- Extensive experience in regulatory compliance and familiarity with relevant industry standards and guidelines.
- Excellent communication and interpersonal skills, with the ability to collaborate effectively with clients, colleagues, and regulatory agencies.
- Strong business acumen and the ability to drive strategic initiatives, deliver results, and manage budgets.
- Exceptional leadership and team management capabilities, fostering a collaborative and high-performance culture.
- Strong problem-solving skills, with the ability to analyze complex geotechnical challenges and develop innovative solutions.

Join this amazing company and be part of a dynamic team dedicated to delivering sustainable and innovative geotechnical solutions. They offer competitive compensation, comprehensive benefits, and opportunities for professional growth and development.
